

ABOUT US

This workshop was developed to provide some helpful information for families and others whose lives are connected to individuals with alcohol and/or other drug issues.

The program consists of educational sessions formulated to increase awareness of: substance-related consequences, effects on others, addiction as a brain disease and options for help.

WHY NEEDED?

Substance misuse touches every family in every community. Statistics suggest that 66% of the population uses alcohol and/or other drugs. Of those, 20% experience major life consequences from abuse and 10% develop the disease of addiction. Each of them affects 4-5 other lives.
